## PROJECTS

---

### **SRINGS.LY** - React App

Software Engineer

Apr 2020

- Designed Single-Page Application, built on the MERN stack, which allows users to keep track of which Florida springs they've visited, to add, delete or update new spots to swim
- Accomplished through RESTful routes and Model-View-Controller architecture
- Launched during General Assembly's *Software Engineering Immersive Remote* boot camp

### **ANGULAR vs. REACT vs. VUE** - App comparison

Software Engineer

Oct 2020 - Mar 2021

- Developed a series of mobile-first websites, originally prototyped in Adobe XD then customized with Bulma, which resulted in three sites (same content) built using different frameworks: AngularJS, React.js and Vue.js
- All three websites have a responsive navbar and fetch from the same placeholder API
- Created post-boot camp, plus an additional Bootstrap website that compares core differences

### **RESTAURANT APP** - PHP App

Software Engineer

Apr 2020

- Coded dynamically with PHP, the app features a global header and footer into which code is injected. Menu and team member items are populated and accessed by API arrays. Hamburger menu visible at mobile breakpoints. Made post-boot camp from a Udemy course
